

H a r v e s t M o o n

It's so very strange indeed
To have a holy war
When holy men say peace
Were just Earth's children after all

Getting good is evolution
We're science and we're spiritual
You're nurturing your nature
Transforming your world

Whatever your future
Your Karma will suit ya

If there is a one
Truth - you're trying to find
It's inside
Inside of everyone
It shines
Shines without a name
So now it's time
To let your light side free again

You ... Earth and Stars are in tune
Light the world
Like a harvest Moon

We've got different ways to be
And our own self mystery
We've got an equal value
Strange idiosyncrasy

We all have our own dharma
Our imprint destiny
We've got a range of choices
A soul and a chemistry

Designing your future
Your Karma will suit ya

If there is a one
Truth - you're trying to find
It's inside - Inside of everyone
It shines - Shines without a name
So now it's time
To let your light side free again

You ... Earth and Stars are in tune
Come on, light the World
Like a Harvest Moon

Some find the truth in buildings
Some find it in the stars
Some think women are from Venus and men are from Mars

Some find the truth in their genes
Some don't know where to start
Some find the truth in books and ideas
Some find it in their hearts

It's not so much resurrection
As just realising your perfection
Learning to go with your own flow
Follow your feelings and you'll know

Sometimes you'll feel just alone
Sometimes the long and painful road
You're the creation of your choices
And every road leads home

Remember your future
Your Karma will suit ya

You ... Earth and Stars are in tune
Come on, light the World
Like a Harvest Moon

Remember your future
Your Karma will suit ya
