

Stonehenge at Sunset and by Starlight

itinerary and approximate schedule

An approximate timetable for this amazing day: timing depends on sunset times for the season and on the weather ...

10.00 the first lecture of the day begins; an outline of the history and geography of Avebury Henge and its immediate landscape

10.20 a clockwise walk around the stones of Avebury ...

11.00 the Kennet Stone Avenue then Silbury Hill

11.15 West Kennet long barrow

11.50 the sanctuary

12.20 To Lockeridge or Honey Street for lunch; the price of the lunch and one drink is included in the tour fee and there will be a vegan choice on the menu.

Either before or after lunch, a view from Alton Barnes: Adam's Grave Longbarrow and a view of the White Horse - a swift visit to the home of Crop Circle enthusiasts at Honey Street ...

2.00 on to Stonehenge landscape:

2.45 Woodhenge, Durrington Walls and the landscape surrounding Stonehenge

4.30 Old Sarum - walk around the perimeter and look at the classic Ley-Line view

5.30 - depending on the timing of the sunset, we will either stop at nearby pub to freshen up and give our feet a rest for the detailed lecture on the history and astronomy of Stonehenge before we prepare to enter the inner circle of this famous ancient monument. Or, we will go immediately to the venue for our evening meal, and the lecture may take place there (this is rather weather dependant ...)

7.30 - 8.30 (timings vary, depending on the sunset time of the year): Inside the inner circle of Stonehenge at Sunset - here, you can explore the site and make the

most of this wonderful opportunity to take once in a lifetime photographs ...

8.40 - 10.15 (timings vary, depending on the sunset time of the year): 2 course meal at the near-by Rollstone Manor; a private venue with excellent food which contains the mood of this very special evening.

The first two courses will each have three choices: meat, fish and vegan. The 2-course meal and one drink are included in the tour fee.

*If you wish to have a desert, please note that this is not included in the tour fee.

10.30 - 11.30 (timings vary, depending on the sunset time of the year): The incredible experience of being inside Stonehenge beneath the Stars. This is how it may have felt when it was first constructed. I've been a regular visitor and Moon light tour guide inside Stonehenge for nineteen years now and while I am always beguiled by our evenings under the Harvest Moon I have to say the experience of being in this ancient temple beneath the stars is incredible. If you have a love of ancient temples, Magik or just drifting beneath the stars, this whole day will be one of those landmark days you remember for years.

Walking these places is truly magical and for me; a highlight of the year and I look forward to sharing it with you

In kindness

David
